1. MATERIAL AND COMPANY IDENTIFICATION

Material Name : Shell Adrana D 408

Uses : Metalworking oil concentrate.

Manufacturer/Supplier : SOPUS Products
PO Box 4427
Houston, TX 77210-4427
USA

MSDS Request : 877-276-7285

Emergency Telephone Number
Spill Information : 877-242-7400
Health Information : 877-504-9351

2. COMPOSITION/INFORMATION ON INGREDIENTS

</thead>
<tbody>
<tr>
<td>liquid at room temperature. Slight hydrocarbon.</td>
<td></td>
</tr>
</tbody>
</table>

Health Hazards : Not classified as dangerous for supply or conveyance.
Safety Hazards : Not classified as flammable but will burn.
Environmental Hazards : Not classified as dangerous for the environment.

Health Hazards : Not expected to be a health hazard when used under normal conditions.

Health Hazards
- **Inhalation** : Slightly irritating to respiratory system.
- **Skin Contact** : May cause slight irritation to skin.
- **Eye Contact** : May cause slight irritation to eyes.
- **Ingestion** : Low toxicity if swallowed.

Other Information : Used oil may contain harmful impurities.

Aggravated Medical Condition : Pre-existing medical conditions of the following organ(s) or organ system(s) may be aggravated by exposure to this material: Skin. Respiratory system.

Environmental Hazards : Not classified as dangerous for the environment.

Additional Information : Under normal conditions of use or in a foreseeable emergency, this product meets the definition of a hazardous chemical when
Material Safety Data Sheet

4. FIRST AID MEASURES

General Information: Not expected to be a health hazard when used under normal conditions.
Inhalation: Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.
Skin Contact: Remove contaminated clothing. Immediately flush skin with large amounts of water for at least 15 minutes, and follow by washing with soap and water if available. If redness, swelling, pain and/or blisters occur, transport to the nearest medical facility for additional treatment. If persistent irritation occurs, obtain medical attention.
Eye Contact: Flush eyes with water while holding eyelids open. Rest eyes for 30 minutes. If redness, burning, blurred vision, or swelling persist, transport to the nearest medical facility for additional treatment. If persistent irritation occurs, obtain medical attention.
Ingestion: In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.
Advice to Physician: Treat symptomatically.

5. FIRE FIGHTING MEASURES

Clear fire area of all non-emergency personnel.
Flash point: Not applicable.
Upper / lower Flammability or Explosion limits: Typical 1 - 10 %/V(based on mineral oil)
Auto ignition temperature: > 320 °C / 608 °F
Specific Hazards: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds.
Suitable Extinguishing Media: Foam. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
Unsuitable Extinguishing Media: Do not use water in a jet.
Protective Equipment for Firefighters: Proper protective equipment including breathing apparatus must be worn when approaching a fire in a confined space.
Additional Advice: Keep adjacent containers cool by spraying with water.

6. ACCIDENTAL RELEASE MEASURES

Avoid contact with spilled or released material. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. See Chapter 13 for information on disposal. Observe all relevant local and international regulations.
Material Safety Data Sheet

Protective measures: Avoid contact with skin and eyes. Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.

Clean Up Methods: Slippery when spilt. Avoid accidents, clean up immediately. Prevent from spreading by making a barrier with sand, earth or other containment material. Reclaim liquid directly or in an absorbent. Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.

Additional Advice: Local authorities should be advised if significant spillages cannot be contained.

7. HANDLING AND STORAGE

General Precautions: Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Properly dispose of any contaminated rags or cleaning materials in order to prevent fires. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

Handling: Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used.

Storage: Keep container tightly closed and in a cool, well-ventilated place. Use properly labelled and closeable containers. Storage Temperature: 0 - 50 °C / 32 - 122 °F

Recommended Materials: For containers or container linings, use mild steel or high density polyethylene.

Unsuitable Materials: PVC.

Additional Information: Polyethylene containers should not be exposed to high temperatures because of possible risk of distortion.

Additional Information: Guidance values for metalworking fluid exposure limits have been released by the HSE and are contained within "working safely with metalworking fluids": Neat-oil metalworking fluid - guidance value of 3 mg/m3, Water-mix metalworking fluid - guidance value of 1 mg/m3.

Exposure Controls: The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations. Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

Personal Protective Equipment: Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Respiratory Protection: No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapours [boiling point >65 °C (149 °F)].

Hand Protection: Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection: PVC or neoprene rubber gloves.
Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

**Eye Protection**
- Wear safety glasses or full face shield if splashes are likely to occur.

**Protective Clothing**
- Skin protection not ordinarily required beyond standard issue work clothes.

**Monitoring Methods**
- Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

**Environmental Exposure Controls**
- Heat, flames, and sparks.

### 9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance**
- Liquid at room temperature.

**Odour**
- Slight hydrocarbon.

**pH**
- Not applicable.

**Initial Boiling Point and Boiling Range**
- > 100 °C / 212 °F

**Pour point**
- Not applicable.

**Flash point**
- Not applicable.

**Upper / lower Flammability or Explosion limits**
- Typical 1 - 10 % (V) (based on mineral oil)

**Auto-ignition temperature**
- > 320 °C / 608 °F

**Vapour pressure**
- < 0.5 Pa at 20 °C / 68 °F (estimated value(s))

**Density**
- Typical 998 g/cm³ at 20 °C / 68 °F

**Water solubility**
- Completely Soluble

**n-octanol/water partition coefficient (log Pow)**
- > 6 (based on information on similar products)

**Kinematic viscosity**
- Data not available

**Vapour density (air=1)**
- > 1 (estimated value(s))

**Evaporation rate (nBuAc=1)**
- Data not available

### 10. STABILITY AND REACTIVITY

**Stability**
- Stable.

**Conditions to Avoid**
- Extremes of temperature and direct sunlight.

**Materials to Avoid**
- Strong oxidising agents. DO NOT add nitrates or any nitrosating agents. May react with amines and form nitrosamines which cause cancer in animal tests.

**Hazardous Decomposition Products**
- Hazardous decomposition products are not expected to form during normal storage.
11. TOXICOLOGICAL INFORMATION

Basis for Assessment: Information given is based on data on the components and the toxicology of similar products.

Acute Oral Toxicity: Expected to be of low toxicity: LD50 > 5000 mg/kg, Rat
Acute Dermal Toxicity: Expected to be of low toxicity: LD50 > 5000 mg/kg, Rabbit
Acute Inhalation Toxicity: Not expected to be a hazard.
Skin Irritation: Expected to be slightly irritating.
Eye Irritation: Expected to be slightly irritating.
Respiratory Irritation: Inhalation of vapours or mists may cause irritation.
Sensitisation: Not expected to be a skin sensitiser.
Repeated Dose Toxicity: Not expected to be a hazard.
Mutagenicity: Not considered a mutagenic hazard.
Carcinogenicity: Components are not known to be associated with carcinogenic effects.

<table>
<thead>
<tr>
<th>Material</th>
<th>Carcinogenicity Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Triethanolamine</td>
<td>IARC 3: Classification not possible from current data.</td>
</tr>
</tbody>
</table>

Reproductive and Developmental Toxicity: Not expected to be a hazard.

Additional Information: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible. Properly manage used fluids. Used metalworking fluids may accumulate harmful bacteria. Breathing mists generated during use may cause hypersensitivity pneumonitis or aggravate existing asthma symptoms. DO NOT add nitrites or any nitrosating agents. May react with amines and form nitrosamines which cause cancer in animal tests.

12. ECOLOGICAL INFORMATION

Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products.

Acute Toxicity: Poorly soluble mixture. May cause physical fouling of aquatic organisms. Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l (LL/EL50 expressed as the nominal amount of product required to prepare aqueous test extract). Mineral oil is not expected to cause any chronic effects to aquatic organisms at concentrations less than 1 mg/l.

Mobility: Liquid under most environmental conditions. Floats on water. If it enters soil, it will adsorb to soil particles and will not be mobile.

Persistence/degradability: Expected to be not readily biodegradable. Major constituents are expected to be inherently biodegradable, but the product contains components that may persist in the environment.
Bioaccumulation : Contains components with the potential to bioaccumulate.
Other Adverse Effects : Product is a mixture of non-volatile components, which are not expected to be released to air in any significant quantities. Not expected to have ozone depletion potential, photochemical ozone creation potential or global warming potential.

13. DISPOSAL CONSIDERATIONS

Material Disposal : Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses.

Container Disposal : Dispose in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.

Local Legislation : Disposal should be in accordance with applicable regional, national, and local laws and regulations.

14. TRANSPORT INFORMATION

US Department of Transportation Classification (49CFR)
This material is not subject to DOT regulations under 49 CFR Parts 171-180.

IMDG
This material is not classified as dangerous under IMDG regulations.

IATA (Country variations may apply)
This material is not classified as dangerous under IATA regulations.

15. REGULATORY INFORMATION

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Federal Regulatory Status

Notification Status

EINECS All components listed.
TSCA All components listed.
DSL All components listed.

SARA Hazard Categories (311/312)
No SARA 311/312 Hazards.
Material Safety Data Sheet

State Regulatory Status

California Safe Drinking Water and Toxic Enforcement Act (Proposition 65)

This material does not contain any chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

New Jersey Right-To-Know Chemical List

- Ethanolamine (141-43-5) Listed.

Pennsylvannia Right-To-Know Chemical List

- Distillates (petroleum), solvent-refined heavy naphthenic (64741-96-4) Listed.
- Ethanolamine (141-43-5) Listed.
- Triethanolamine (102-71-6) Listed.

16. OTHER INFORMATION

- NFPA Rating (Health, Fire, Reactivity): 0, 1, 0
- MSDS Version Number: 2.0
- MSDS Effective Date: 07/10/2008
- MSDS Revisions: A vertical bar (|) in the left margin indicates an amendment from the previous version.
- MSDS Regulation: The content and format of this MSDS is in accordance with the OSHA Hazard Communication Standard, 29 CFR 1910.1200.
- MSDS Distribution: The information in this document should be made available to all who may handle the product.
- Disclaimer: The information contained herein is based on our current knowledge of the underlying data and is intended to describe the product for the purpose of health, safety and environmental requirements only. No warranty or guarantee is expressed or implied regarding the accuracy of these data or the results to be obtained from the use of the product.
