SHELL ENSIS®
COMPOUND DW 1012
Solvent based corrosion inhibitor

Product Description
Shell Ensis Compound DW 1012 is a solvent based, water displacing corrosion inhibitor intended to provide nine to twelve months of indoor corrosion protection for ferrous metals under typical conditions. Shell Ensis Compound DW 1012 is an excellent choice when fast curing time is needed for parts that will be nested together. Surface films of this product are readily removed with typical industrial alkaline cleaners or by vapor degreasing.

Applications
- used in dip, spray, or fogging applications
- used where excellent displacement of water or alkaline cleaners is required

Features/Benefits
- long term indoor protection helps eliminate rework
- excellent water displacing ability helps provide a clean split with cleaner bath to extend bath life
- easily cleaned which helps prevent interference with subsequent operations
- leaves a non-tacky film helping to prevent parts from sticking together
- fast evaporation rate aids in increasing production rates

Typical Properties of Shell Ensis Compound DW 1012
